FINANCIAL AND COMMERCIAL

RAILROADS DEPRESSED. Crop Scare and Cotton Estimates Prove Disturbing Factors.

New York, Aug. 1.—Contrary to expectations in some quarters, the intention of the government to deposit unds at points in the west and southvest so as to expedite the movement of crops on securities values today. In financial quarters the statement of the secretary of the treasury dealing with this matter was received with some resentment, there being a disposition to question the legal right of the authorities at Washington to accept commercial paper as collateral for federal deposits. Other developments, including the first real "crop scare" of the season,

and the government's unfavorable estimate for cotton were more disturb-ing and far-reaching. Advices, more or less authoritative, indicated further severe damage to corn by reason of the extended drought in the south-west, and the cotton estimate was more than two points under that submitted a few weeks ago, though less than a point under the average of the past decade. Corn options rose ecitedly at leading markets and shares of roads in the south and southwest were correspondingly depressed.

The movement spread until it embraced practically all railroad groups, almost the sole exception being Balti-more & Ohio. Illinois Central fell lower than on the day of its dividend reduction, while New York Central and some of its allied lines, Atchison and Pennsylvania all of which sub and Pennsylvania, all of which submitted adverse July reports, were under more or less pressure. A sharp break in Mexican Railways 2nd pre-ferred called attention to the increasing financial embarrassments of the Mexican republic, with hints of an early suspension of fiscal obligations. The reaction ran from one to two points, with no material change in the later dealings which were dull and circumscribed.

The local money market was practically unchanged, save for a stiffening of ninety day accommodations. The general supply was lighter, with a decrease of interior offerings. The cash movement indicated a gain for the week of about \$4,500,000.

The general bond market was inclined to yield, with sharp declines in speculative, Issues, Covernment in the co
